

SILICON MARKETING

System & Workflow Architecture Enhancement Proposal

Document: OMS Proposal v2.0

Target: Family Business Review & Sign-Off

Date: October 7, 2026

1. EXECUTIVE SUMMARY

This proposal establishes a **frictionless 5-department order fulfillment lifecycle** tailored specifically for Silicon Marketing's wholesale plywood, MDF, and hardware business. It introduces clear client ownership, multi-address support, pricing controls, actual packed-quantity tracking, invoice attachment, multi-order trip bunching, and complete financial audit retention.

2. 5-STAGE OPERATIONAL PIPELINE

3. CUSTOMER & PRODUCT MASTER ENHANCEMENTS

A. Customer Master (CRM)

Feature / Field	Configuration	Business Benefit & Operational Value
Customer Manager	Dropdown (Sales / Staff)	Assigns clear staff ownership. Sales reps know who is responsible for follow-ups and payments.
Multiple Delivery Addresses	Unlimited (Address 1, Warehouse, Site)	Supports clients with multiple godowns, show units, or site locations with 1-click order picker.
Privilege Tier	BRONZE (DEFAULT) SILVERGOLD	Categorizes clients for pricing discounts, credit limits, and priority dispatch.
Urgent Client Flag	Toggle (Priority Client)	Flags VIP contractors so new orders automatically default to Urgent status.
Alternate Contact No.	10-Digit Mobile	Separates owner/proprietor contact from the on-site supervisor or purchase manager.
GST Number (GSTIN)	15-Digit Alphanumeric	Strict validation prevents typos before tax invoices are generated. Must be unique.
Customer Code / ID	Auto-Generated + Editable	Auto-generates sequential codes (e.g. CUST-1001). Admins can edit to match Busy ledger codes.
Customer Alias	Market Nickname	Quick search by the local name verbalized in market trade (e.g. <i>Balaji Ply</i> for <i>Sri Balaji Traders</i>).
Master Field Control	Admin Dropdown Management	Admins can configure and decide exactly which options appear in dropdown menus during customer creation (e.g.

		Customer Managers, Privilege Tiers, Payment Terms, Address Labels). Prevents clutter.
--	--	---

B. Product Master (Inventory)

Change	Implementation	Operational Value
Category → Group Name	Rebranding in UI & DB	Matches standard timber/plywood trade and Busy groups (<i>Plywood Group, MDF Group, Hardware Group</i>).
Anti-Duplication Rules	SKU + Compound Check	Strictly unique SKU. Prevents adding identical product name twice inside the same Group.

4. ORDER CREATION & WORKFLOW CONTROLS

Stage	Key Features & Functionality
Order Creation /dashboard/orders/create	• Customer Manager Badge: Automatically shows assigned manager (uneditable). • Address Picker: Dropdown to pick Address 1, Godown, or custom site address. • Urgent Order Toggle: Flags order as Urgent with high-visibility glowing row colors. • Tax Mode Toggle: Inclusive vs Exclusive of GST per item. • Product Notes: Box below each item for discount or specification instructions. • Last Price Checkbox: Flags the approval team to apply the client's last billed price.
Approve Orders New Sidebar Menu	• Pricing Review: Management reviews item notes and last price requests. • Confirm Price: Approver confirms final rates and clicks Approve Order to release to warehouse.
Warehouse Packing /dashboard/packing	• Packed Quantity Input: Staff inputs actual physical units loaded (e.g. 85 sheets packed vs 100 ordered). • Discrepancy Logging: Directly flags warehouse shortages for billing.
Billing Department /dashboard/billing	• Reconciliation: Billing adjusts Invoiced Qty to match physical Packed Qty. • Invoice Record: Enters Bill Number, Bill Date, and attaches digital PDF Invoice.
Fleet Logistics /dashboard/delivery & App	• Multi-Order Trip Bunching: Assigns multiple neighboring orders to 1 driver in 1 trip. • Split / Batch Delivery: Deliver big orders in separate partial truckloads with separate bills. • GPS Navigation SDK: Driver phone tracks road-snapped location continuously.
Security & Audit Policy	• Admin-Only Deletion: Standard staff cannot permanently delete any order. • Cancellation with Reason: Staff can only Cancel orders with mandatory reason logged. • Permanent Retention: Cancelled orders are never wiped; kept in records for full audit transparency.

5. AGREED DECISIONS & NEXT STEPS

- **Privilege Tiers:** Bronze (Default), Silver, Gold.
- **Customer Code:** Auto-generated (e.g. CUST-1001) with Admin manual override capability (matching Busy ledger codes).
- **Group Name:** Categories converted to Group Name convention (matching Busy product groups).
- **Master Field Control:** Dedicated Admin settings to configure dropdown options during customer creation.
- **Database Migration:** Full Prisma schema updated with new models (CustomerAddress, DispatchBatch, ProductGroup).
